

NODE3: Server Form with Ajax

Objective

Create a form that submits data to your Express web server via AJAX. Output the submitted data in Terminal.

Skills

- Node.js
- AJAX
- jQuery

Resources

- nodejs.org

Requirements

1. Create a node app
2. Create an index.html file with a form
3. Write some jQuery to submit your form via AJAX
4. Submit the form to the "/" endpoint
5. Log the data in Terminal when the form is submitted

Bonus

1. When the form is submitted render a success message on the page.
